

#### PRESS RELEASE-SENTINEL TRIBUNE

The District will be replacing an aging waterline that serves Broadway Street and portions of Locust & Walnut Streets in the village of Weston.

The District anticipates the contractor (H & K Construction) to begin during the week of July 23, 2007, and expects construction to continue into September. During this time, local traffic to resident's homes will be maintained; however, some delays may occur during construction.

If you have any questions, please call John Sopko, the District's project manager or Bill Barber, the District's engineer.

Jerry Greiner  
Executive Director
