Owners/Residents in McComb

Re: SS-2807 McComb Sanitary Sewer Improvements Phase 1

Dear Owners/Residents:

The Northwestern Water & Sewer District ("District") is performing repairs on the sanitary sewer system in your area. This project will replace aging and structurally poor sewer mains that flow to the wastewater treatment plant. The current pipe and manholes contain numerous defects and poor structural integrity.

The sewer main and manholes will be replaced on East Main Street, between South Main and North Park, the alley way between East South and Bond Preble east of Liberty Street, Cora Street, and the alley way between South Main and East South. There will also be sewer main and manhole work performed on Park Street between Perrin and Bond Preble. This project will be performed via open cut construction. Most of the excavation will be in the roadway which will limit traffic, however access to your homes will be maintained. Residents that are connected to the sewer main behind their homes on South Main, East South and Bond Preble will have excavation work performed on their property in the back yard.

The existing sewer main is located in either the road right-of-way or in an easement. Unfortunately, some landscaping may need to be trimmed or removed to access sanitary sewer appurtenances. This may be particularly important if you are connected to the sewer behind your home. Any restoration will occur once the project is completed. Damage to invisible fences, sprinkler systems or the like, that are not clearly identified prior to excavation will not be replaced or repaired.

Hillabrand & Sons Construction is the awarded contractor and will be performing the work on behalf of the District. Construction is anticipated to start in April 2021 and be completed in the fourth quarter of 2021.

If you have any questions in the meantime, please feel free to call Todd Saums, the District's project manager, at (419) 354-9090 ext. 132. Thank you in advance for your cooperation.

Sincerely,
NORTHWESTERN WATER AND SEWER DISTRICT

Todd Saums
Project Manager
