Final Notice: Sugar Ridge Sanitary Sewer Grinder Pump Easement

Dear Resident:

The Northwestern Water & Sewer District (“District”) has completed the design of a sanitary sewer project to serve your property.

As detailed in prior correspondence, the area will be served by the installation of a low pressure force main and grinder pumps. Each home on the project will receive a grinder pump in order to connect to the force main. A 10-foot easement is required on your property where the grinder pump will be located for access.

This is our final attempt to get your easement executed. If the easement is not signed, the grinder pump will be installed at the right-of-way. This will result in additional costs for the owner to make the connection to the grinder pump. If the easements are not signed by November 15, 2021, the grinder pump will be installed at the right-of-way.

Please contact the District’s project manager as soon as possible, Matt Dennis, at (419) 354-9090 ext. 125 or mdennis@nwwsd.org to schedule a meeting to sign the easement agreement.

Sincerely,
NORTHWESTERN WATER AND SEWER DISTRICT

Matt Dennis
